## **DETAILED ACTION**

### ***Response to Amendment***

This action is in response to the applicant's amendment received on 15 January 2009. Claims 3-8 and 12-15 are canceled. Claims 9-11 are withdrawn from consideration. The amendments made to the claims do not place the application in condition for allowance for the reasons set forth below.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1 and 2 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Clark et al. (U.S. Patent No. 5,167,725)** and **Greep et al. (U.S. Publication No.**

**2003/0109865**). Clark discloses a vibrating knife (see entire document) comprising an excision member (4) adapted to excise a target by ultrasonic vibrations (via ultrasonic source 12), wherein the excision member comprises first and second edges (for example, the front edge and back edge) formed by sides (for example, right side and left side). Clark fails to disclose the sides have hydrophobic and hydrophilic coatings.

Greep discloses a coating that may be used to coat a surgical instrument (for example, a blade-like instrument; see paragraph 41). Greep teaches coating the instrument with a multi-character material including a hydrophobic characteristic and a hydrophilic characteristic (for example, see paragraph 65). It would have been obvious to one having ordinary skill in the art at the time the invention was made to coat Clark's vibrating knife with a hydrophilic/hydrophobic film as taught by Greep. Doing so would completely eliminate debris build-up on the blade tip during a procedure (for example, see paragraphs 8 and 9). Such a configuration would enable either edge to be used as a leading edge or trailing edge, depending on the characteristics of the target tissue, since both edges are formed by sides having both hydrophobic and hydrophilic characteristics.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
